

Format Tools

Rohrer AG has over 40 years of experience in the manufacturing of tools. All format tools are designed and manufactured in our own facilities on our state of the art modern CNC machine park. The tools will then be thoroughly tested on the appropriate machine using customer supplied foils and, before dispatch.

Depending on the customers requirements, we can provide full documentation and Key-dimension check protocols for the tried and tested tools. This serves to simplify and expedite the quality for the customer.

As well as the manufacturing of format tools, we can reduce the development time and the costs of new format tools and reduce the technical risk by means of:

- Computer simulation
- Prototyping
- Carry-out proof of principle testing
